

DNA 360° ROTATING LED SCREEN

Immersive Visual experience

SIX CORE FEATURES

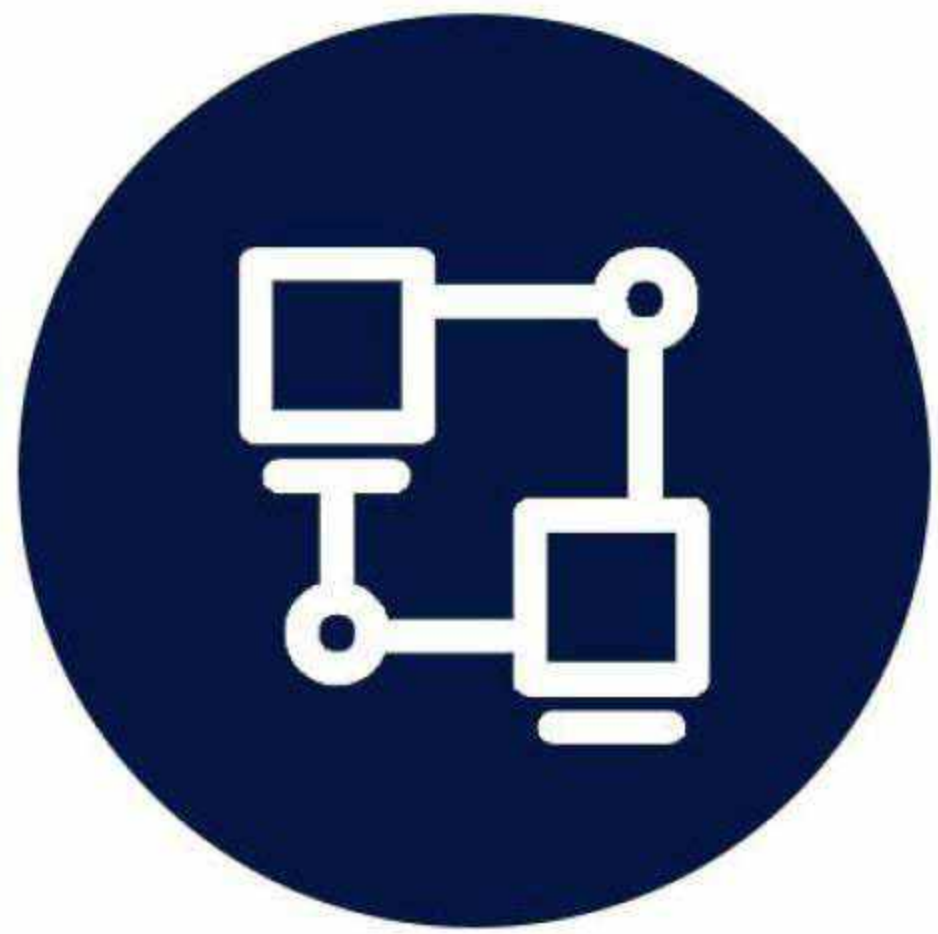

High-end advertising display equipment that integrates innovative technology and artistic display

High-definition display

360 degree rotation function

Intelligent control system

Applicable in multiple scenarios

Energy-saving design

High-quality materials

INTELLIGENT CONTROL SYSTEM

It supports wireless control and timed playback functions, is easy to operate, and can realize synchronous display and content management of multiple screens through remote control.

notebook

cell phone

USB flash drive

PC

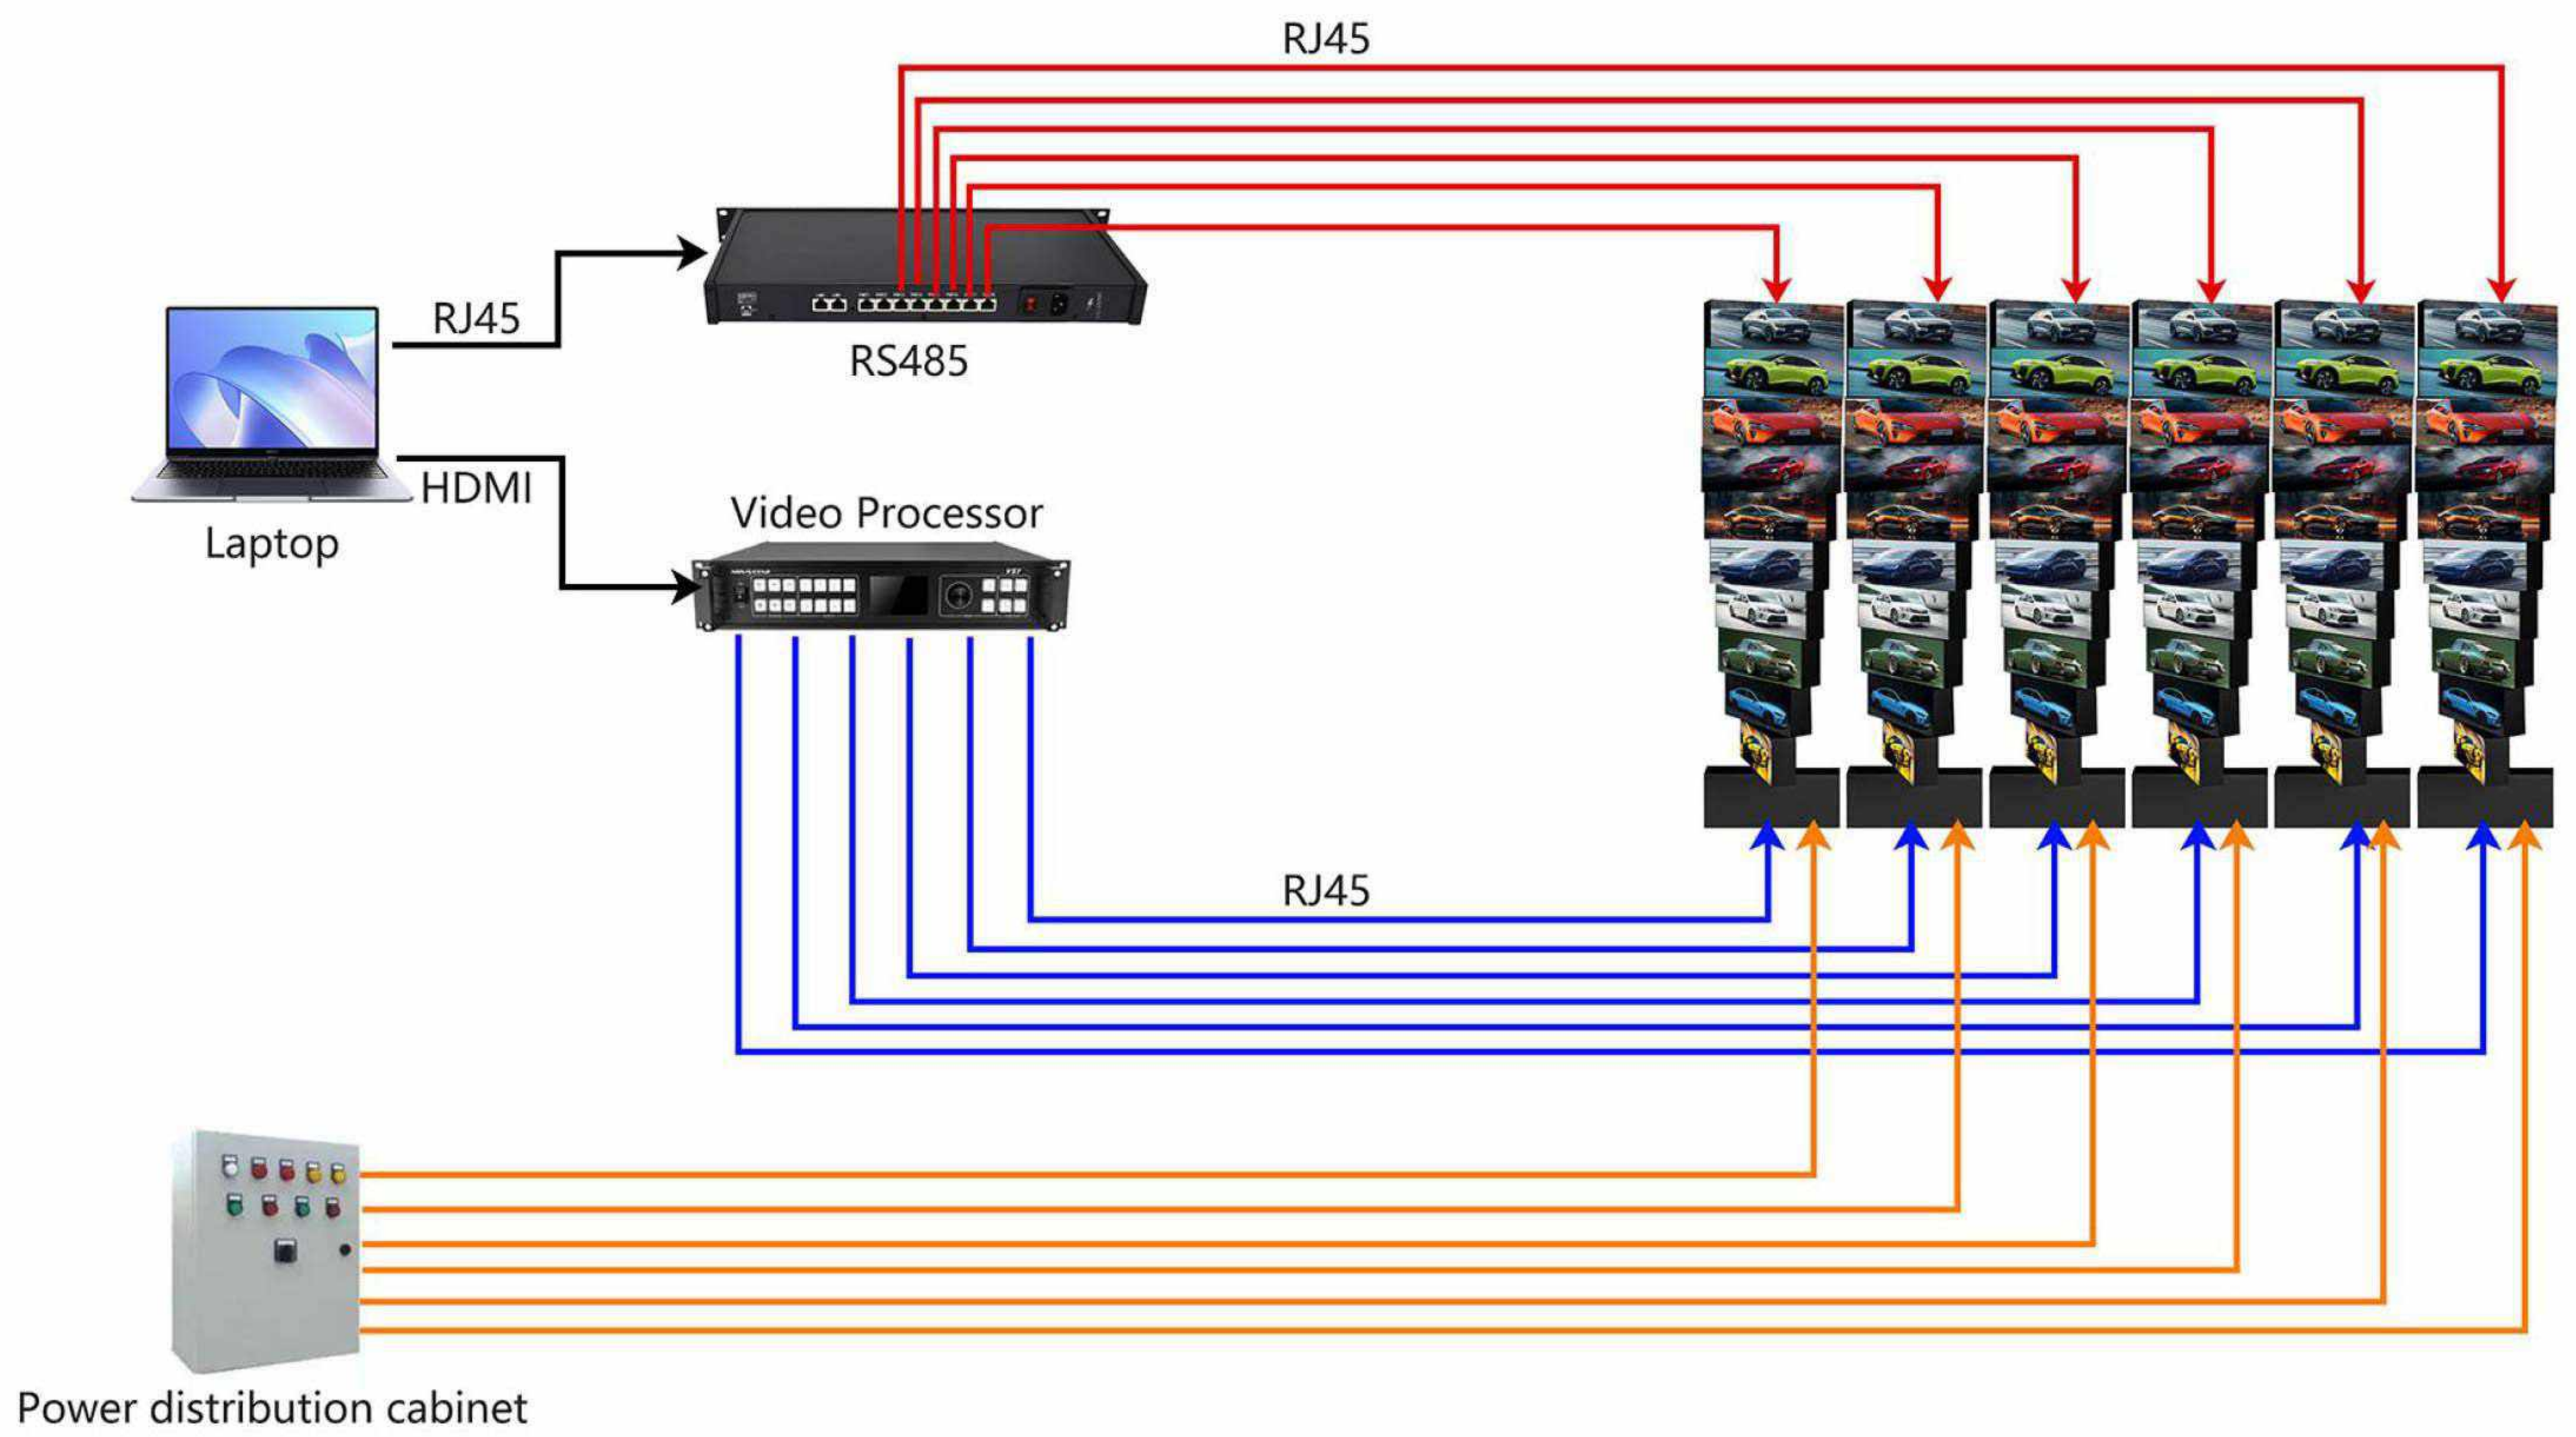

SIX LAYER ROTATING DESIGN

Precision machinery drives 6 layers of independently rotating screens to create naked-eye 3D visual effects, breaking through the limitations of traditional flat-panel displays.

Through precise mechanical control, the screen can switch freely between different angles, making the display content more colorful and attracting the audience's attention.

CREATIVE DISPLAY DOUBLE-SIDED CUSTOMIZATION

Not only can it achieve stunning double-sided display effects, it can also customize a unique combination of mirror and display according to your needs

Double-sided display

A mirror and a display

MULTI-SCENARIO APPLICATION

It is suitable for a variety of scenarios. It can be used for advertising in public places such as shopping malls and exhibitions. It can also be used in brand activities, concerts, and other large-scale events.

shopping mall

Efficiently attract customers' attention and increase brand exposure

Exhibition

Provide dynamic visual effects for exhibitions and increase interactivity

Airport

Provide a convenient advertising platform for public spaces

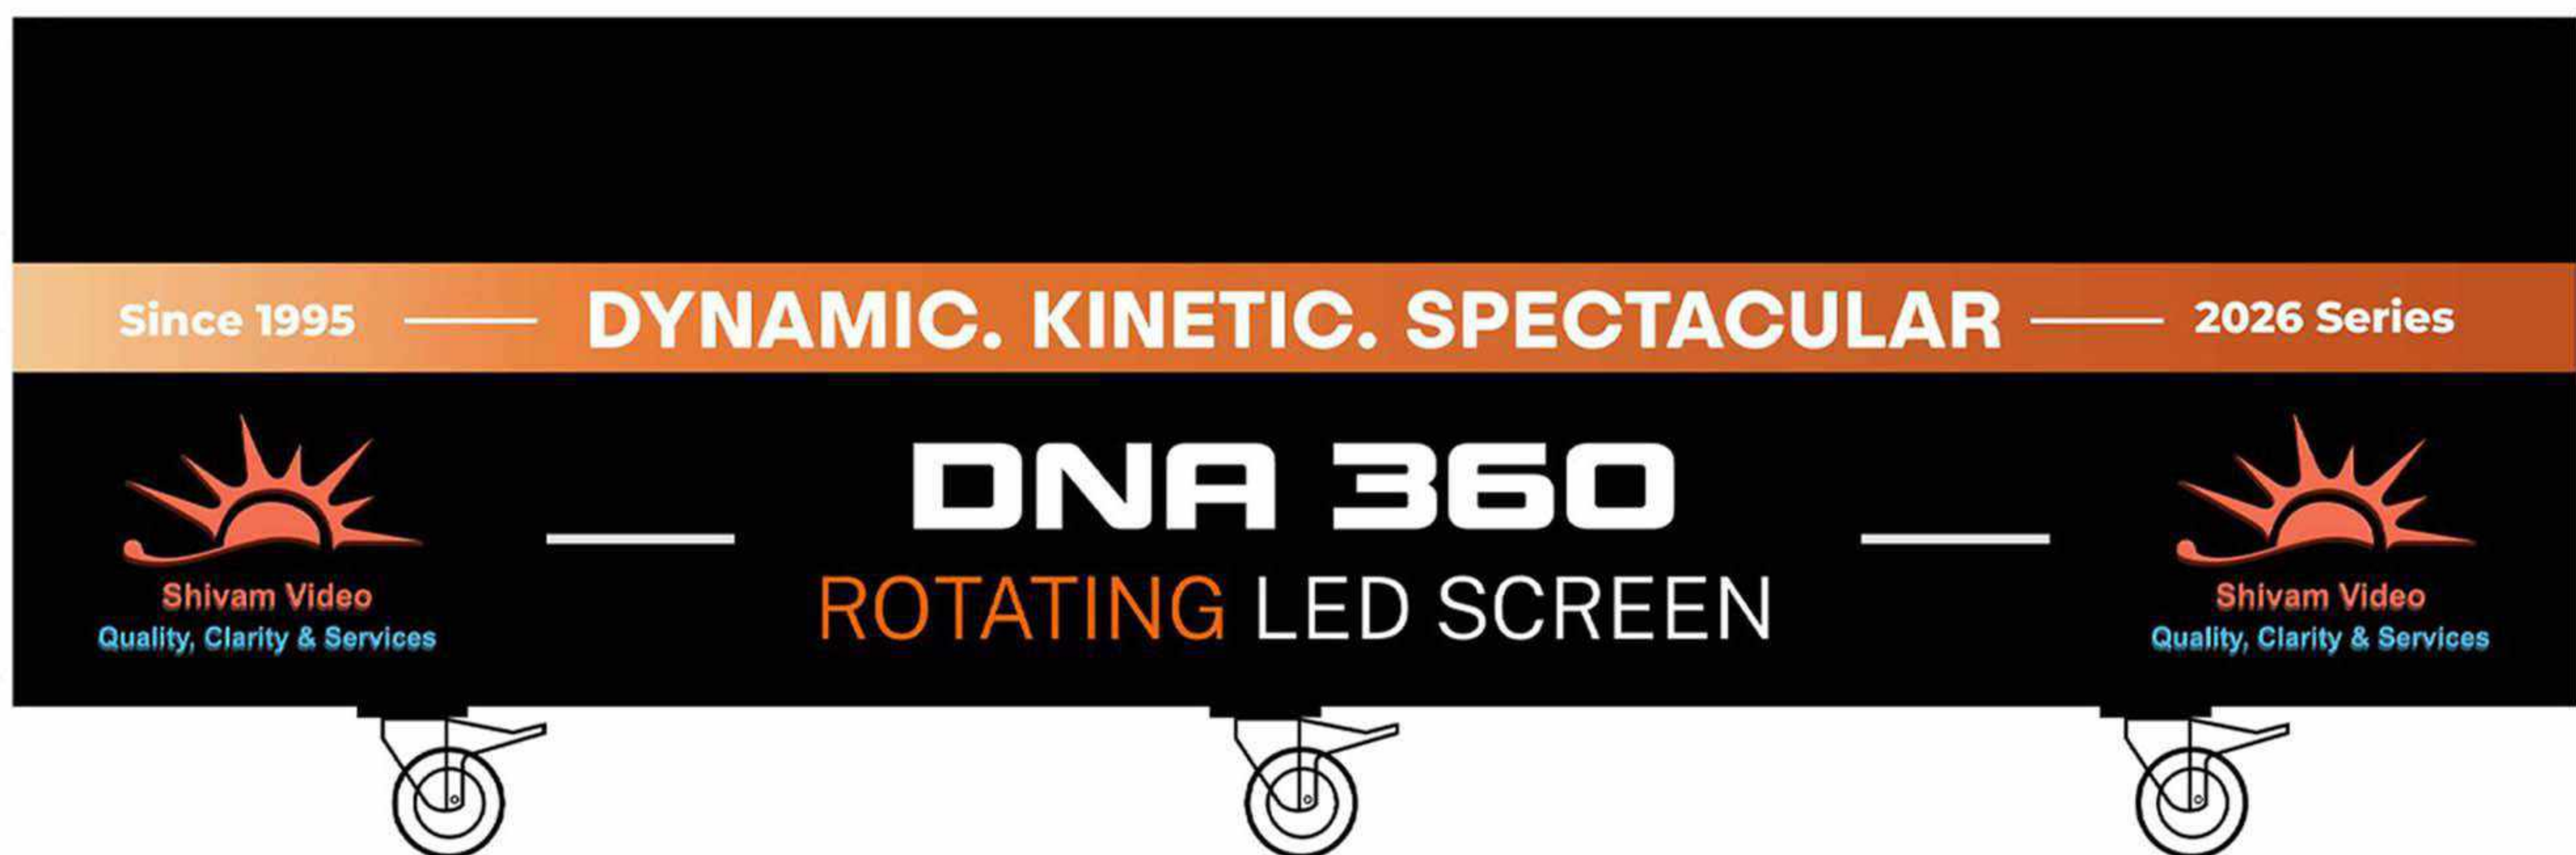

Large events

Provide stunning visual experience for concerts, sports events and other events

PRODUCT INFORMATION

Display	Product Model	P2.5
	Single-sided display size	1250mm*250mm
	Product Layers	Six layers (customizable)
	Single-sided display Res.	1200 by 600 px
	Screen brightness	600-900cd/m ²
	Refresh rate	≥3840Hz
	Input voltage	AC110-240V,50-60Hz
	Service life	100,000 hours
	Base	750mm*300mm
control	Rotation Mode	Optional (different rotation modes can be selected according to the picture requirements)
	Rotation speed	Adjustable (adjust the running speed according to user or screen requirements)
	Switchgear	Remotely switch the device on and off
	Screen Control	Remote publishing is possible
Install	Power supply and network	220V or 380V power supply, network cable or wifi
	Equipment Installation	The equipment is equipped with a chassis, and no base foundation installation is required
	Application Environment	Indoor/Outdoor

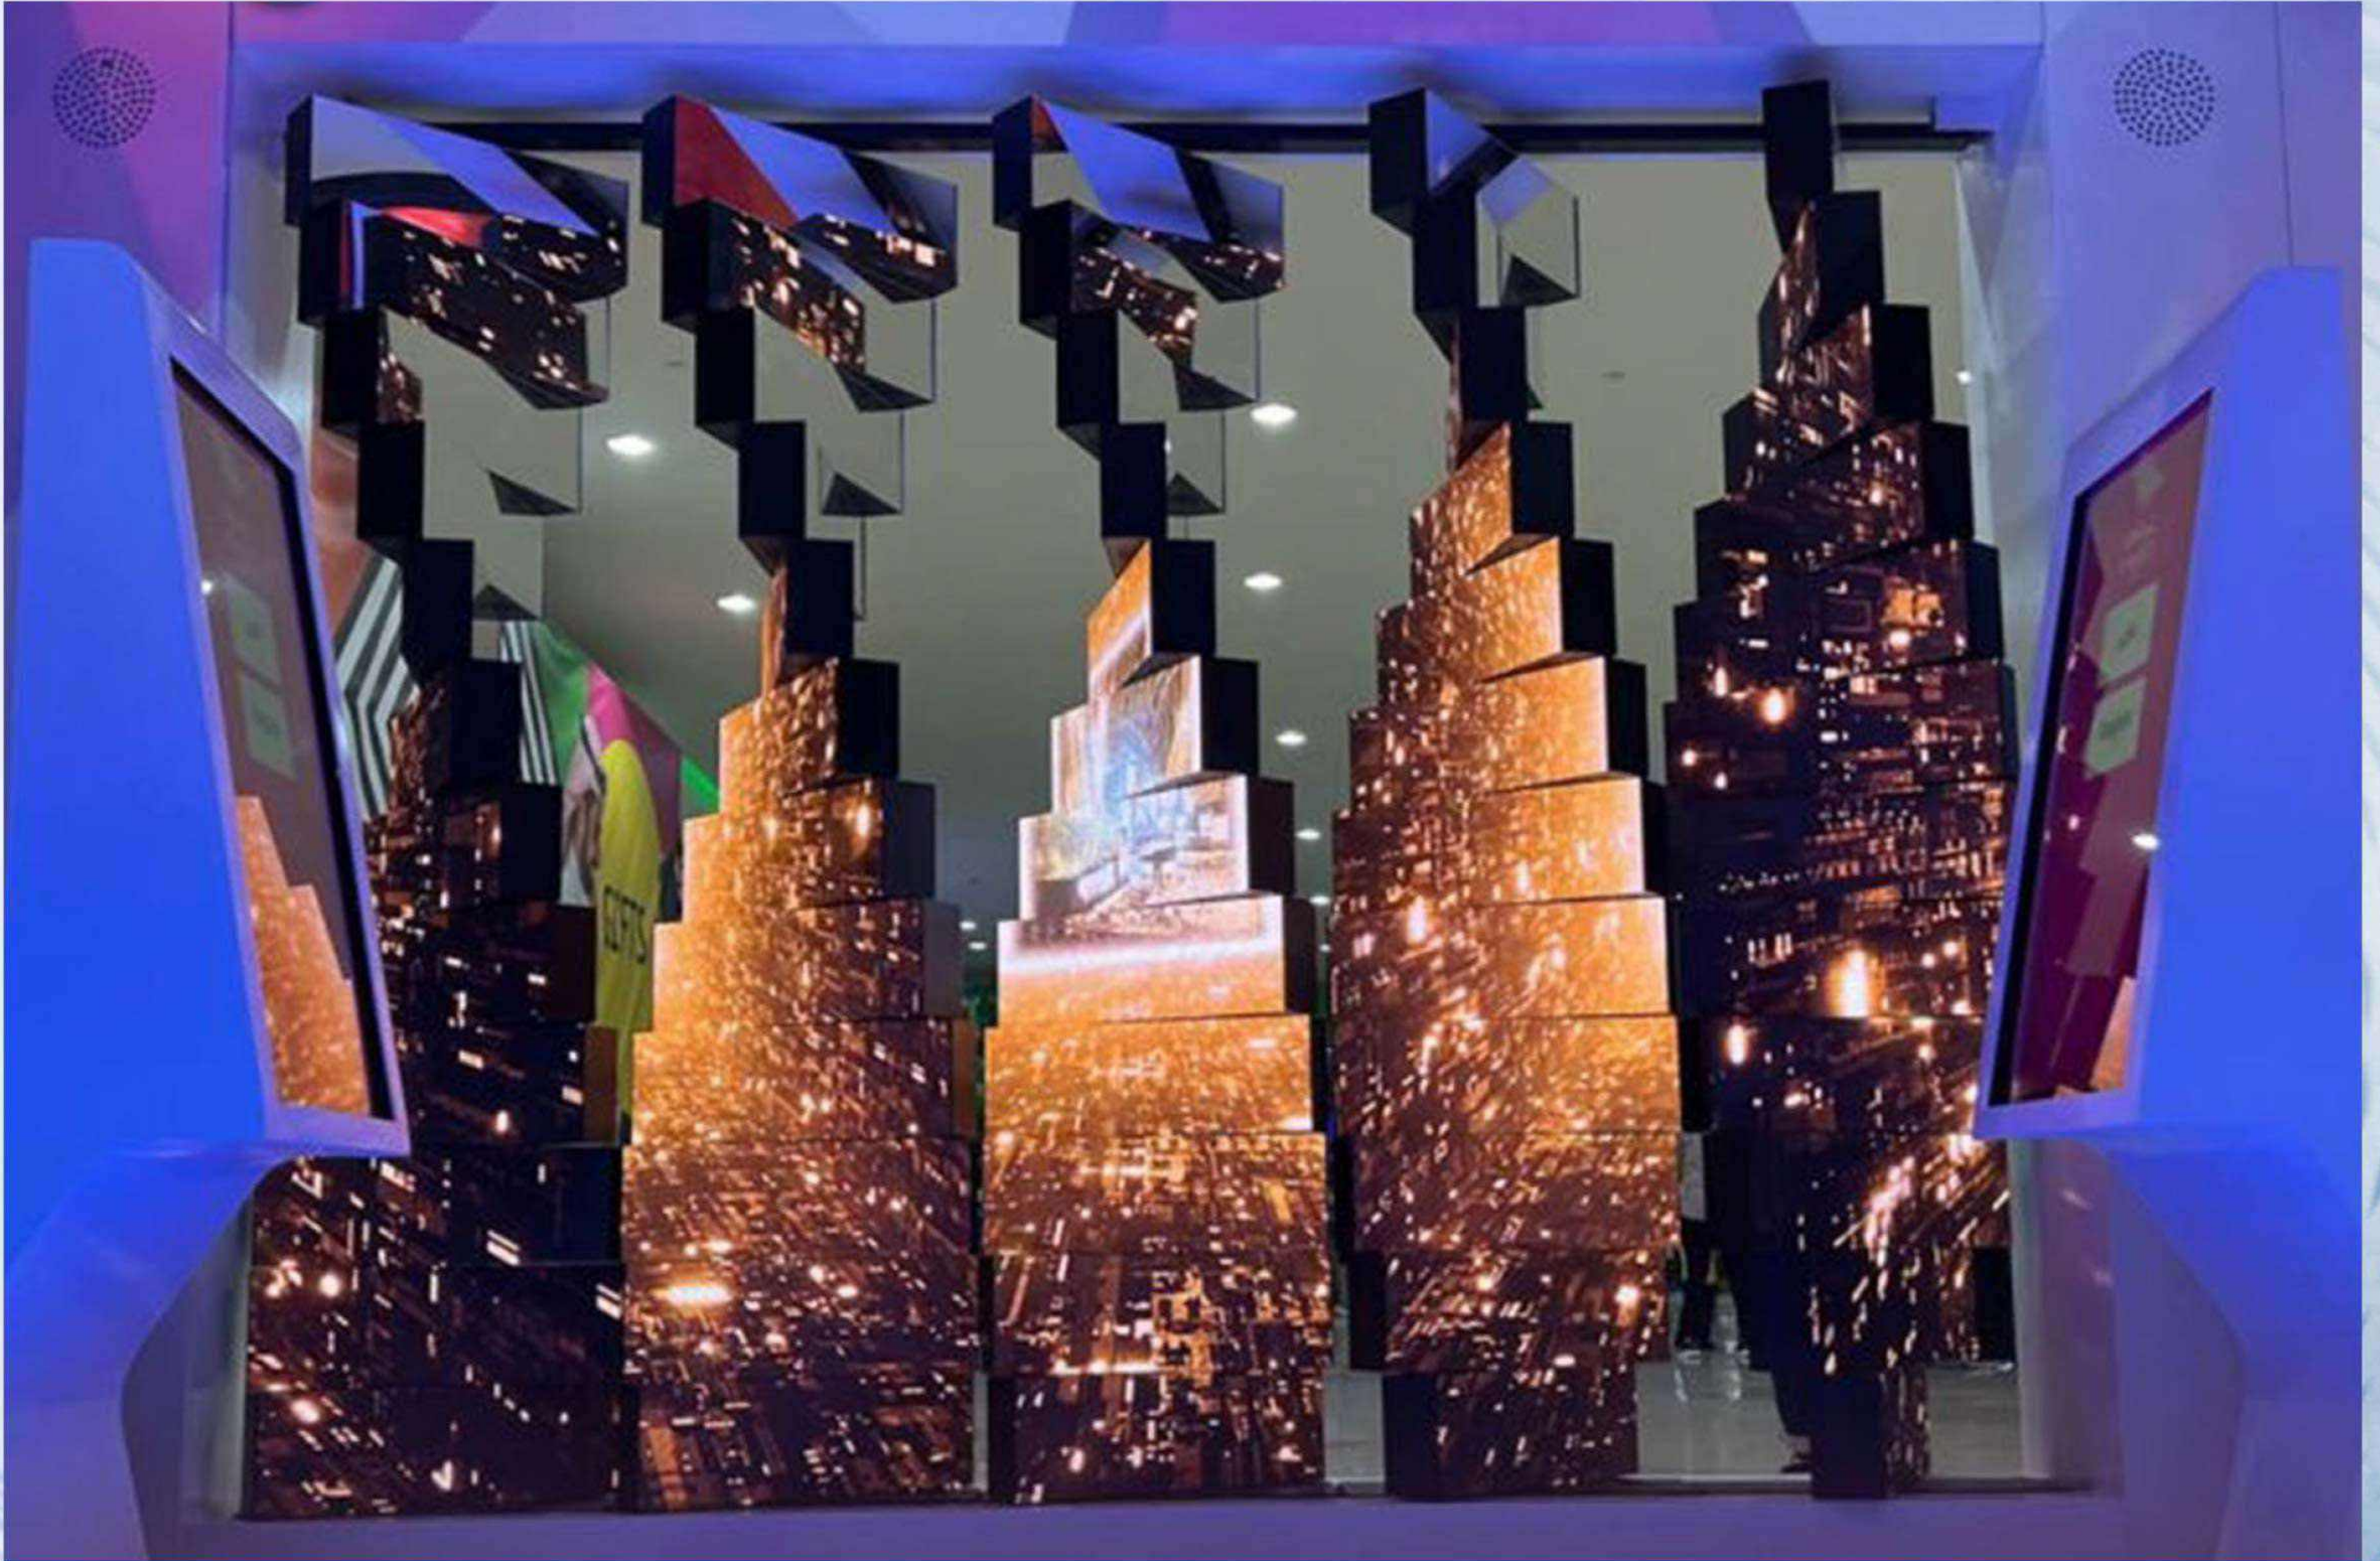

flight case packaging

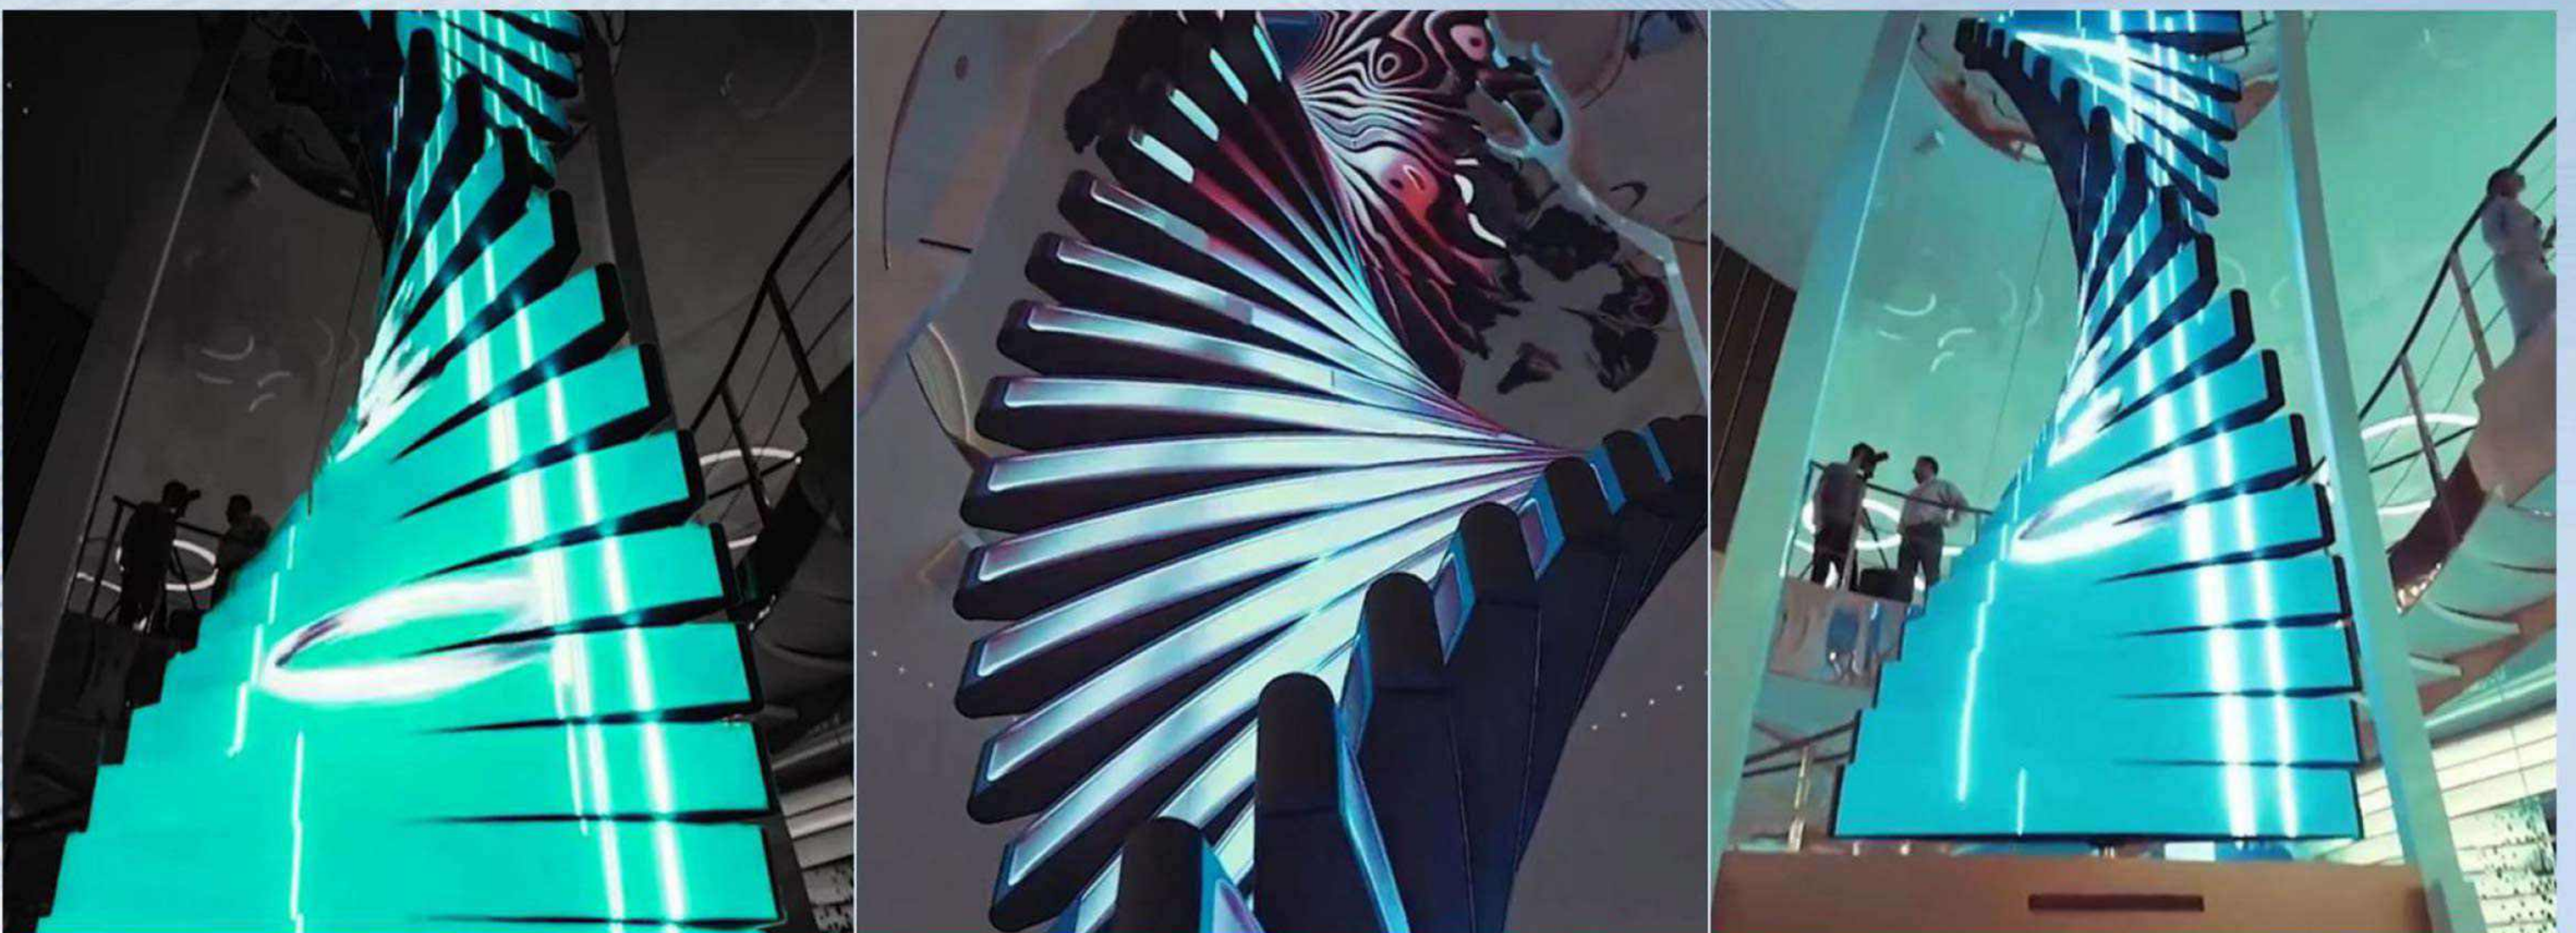

Flight case size	2980mm*980mm*680mm
Rotating screen weight	202kg
Overall weight	317kg

REAL CASE DISPLAY

Let the space flow and upgrade creativity

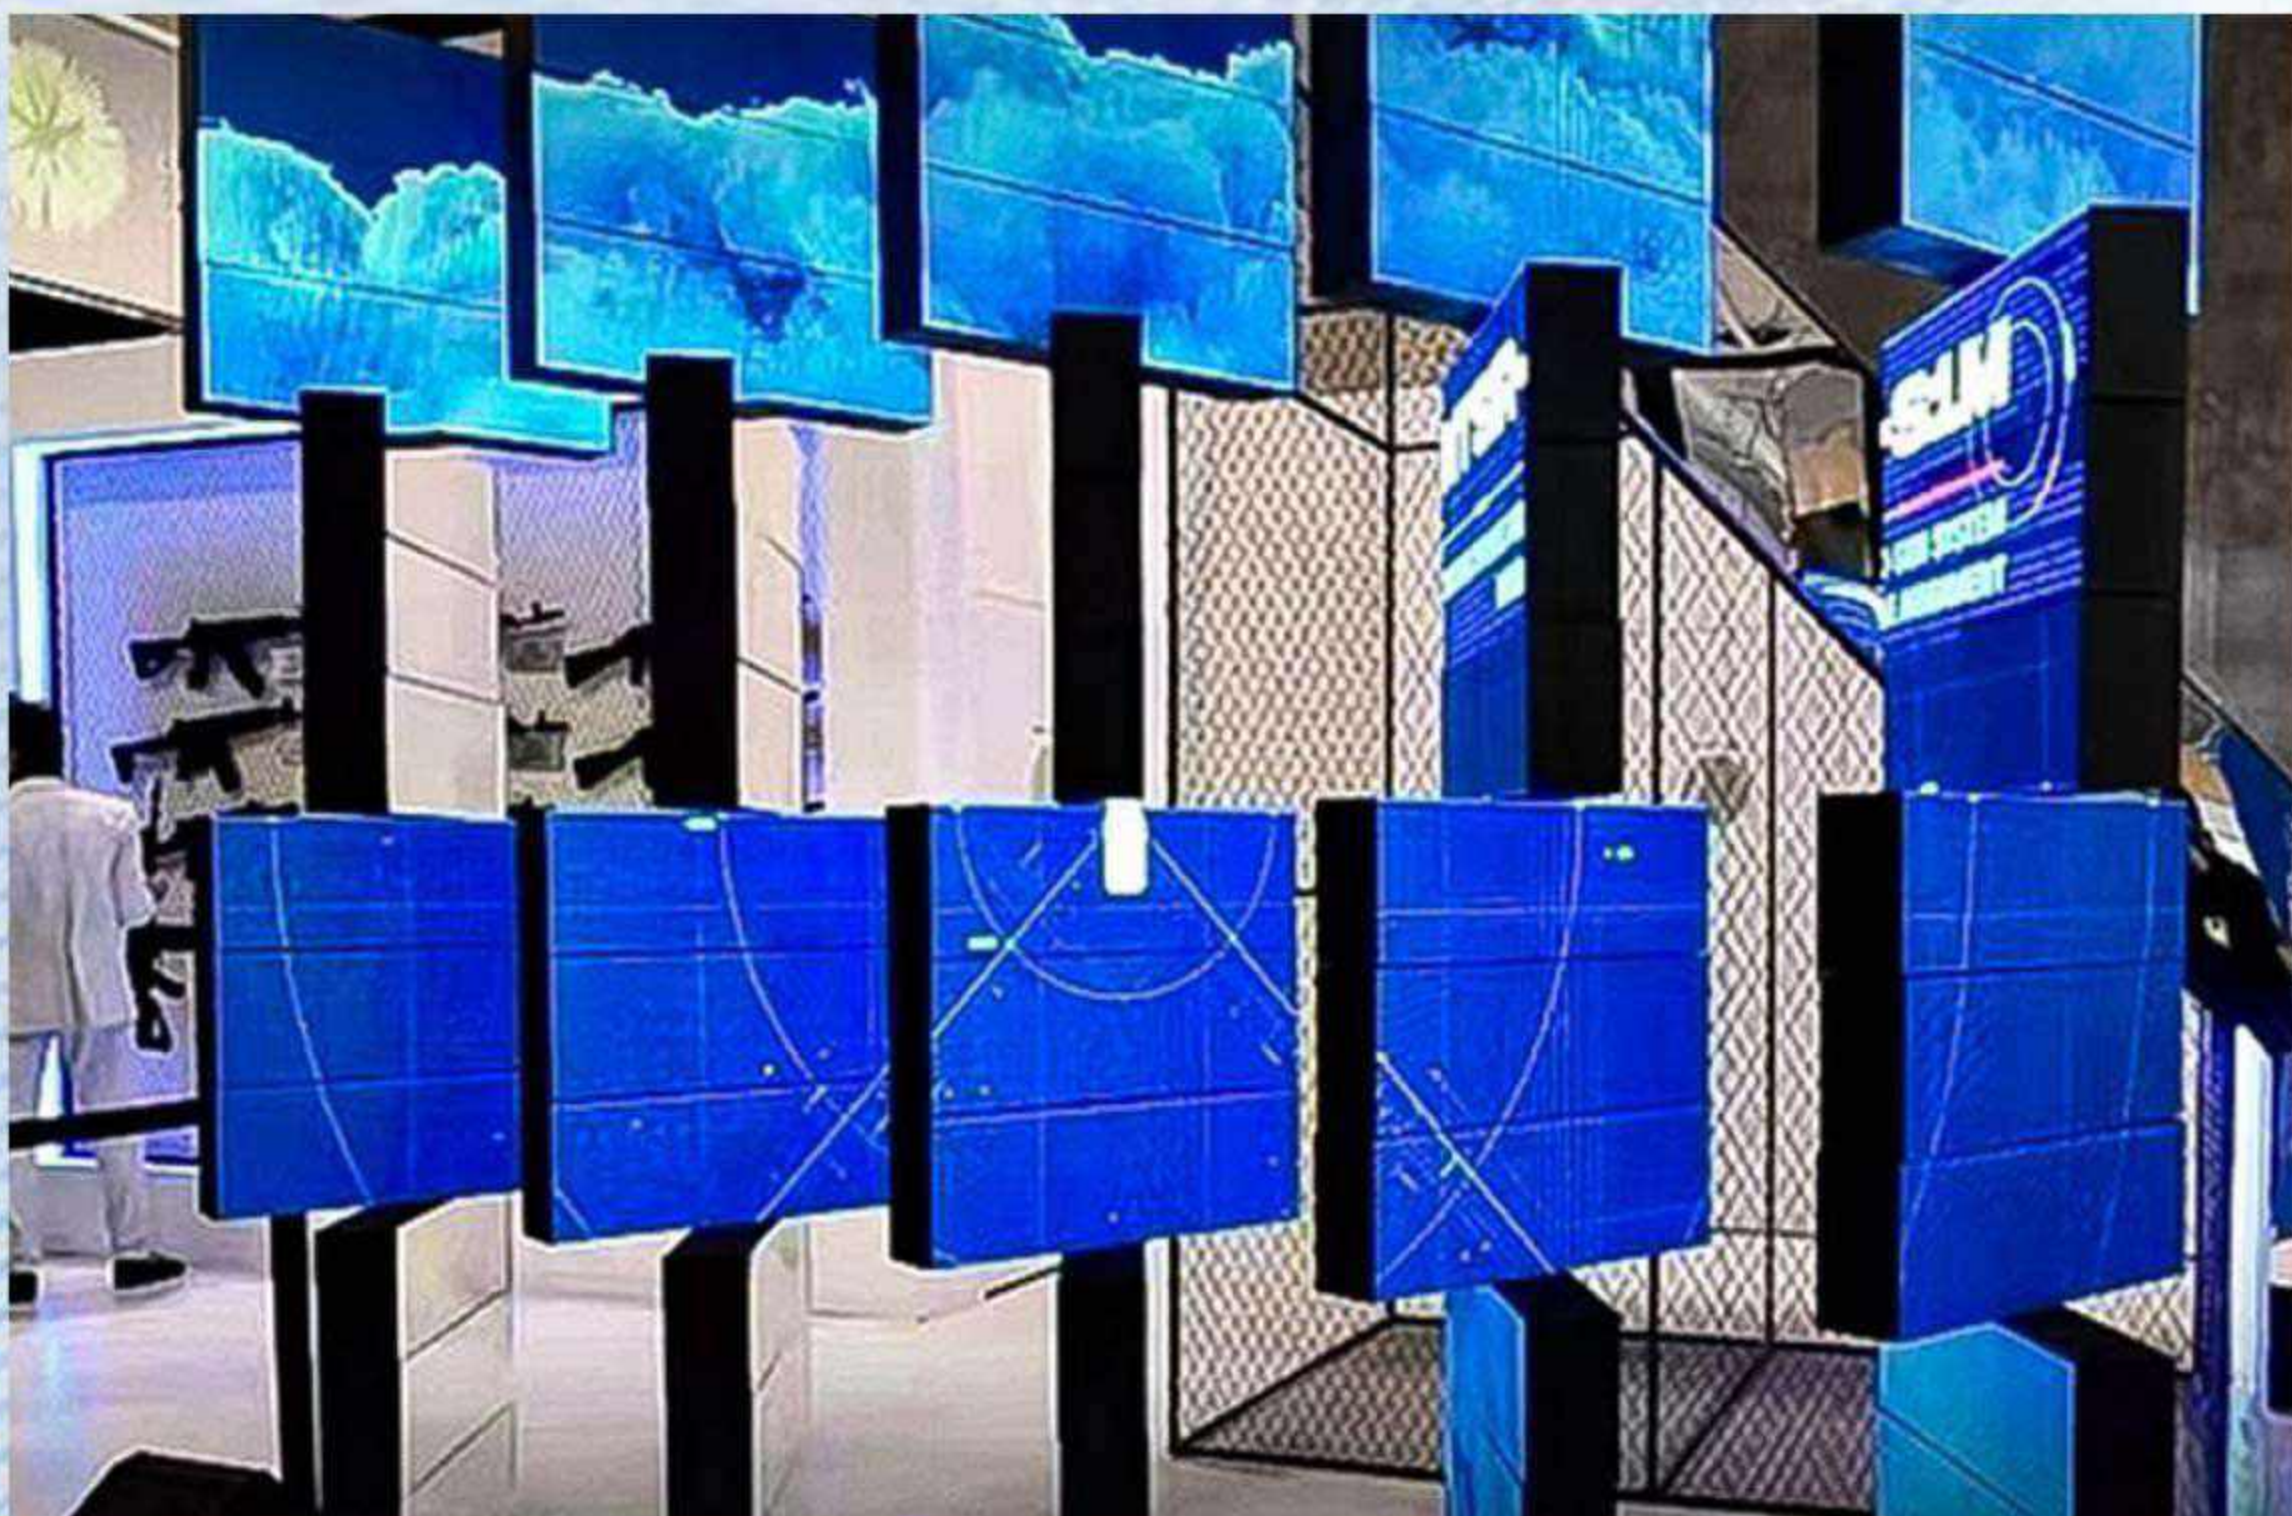

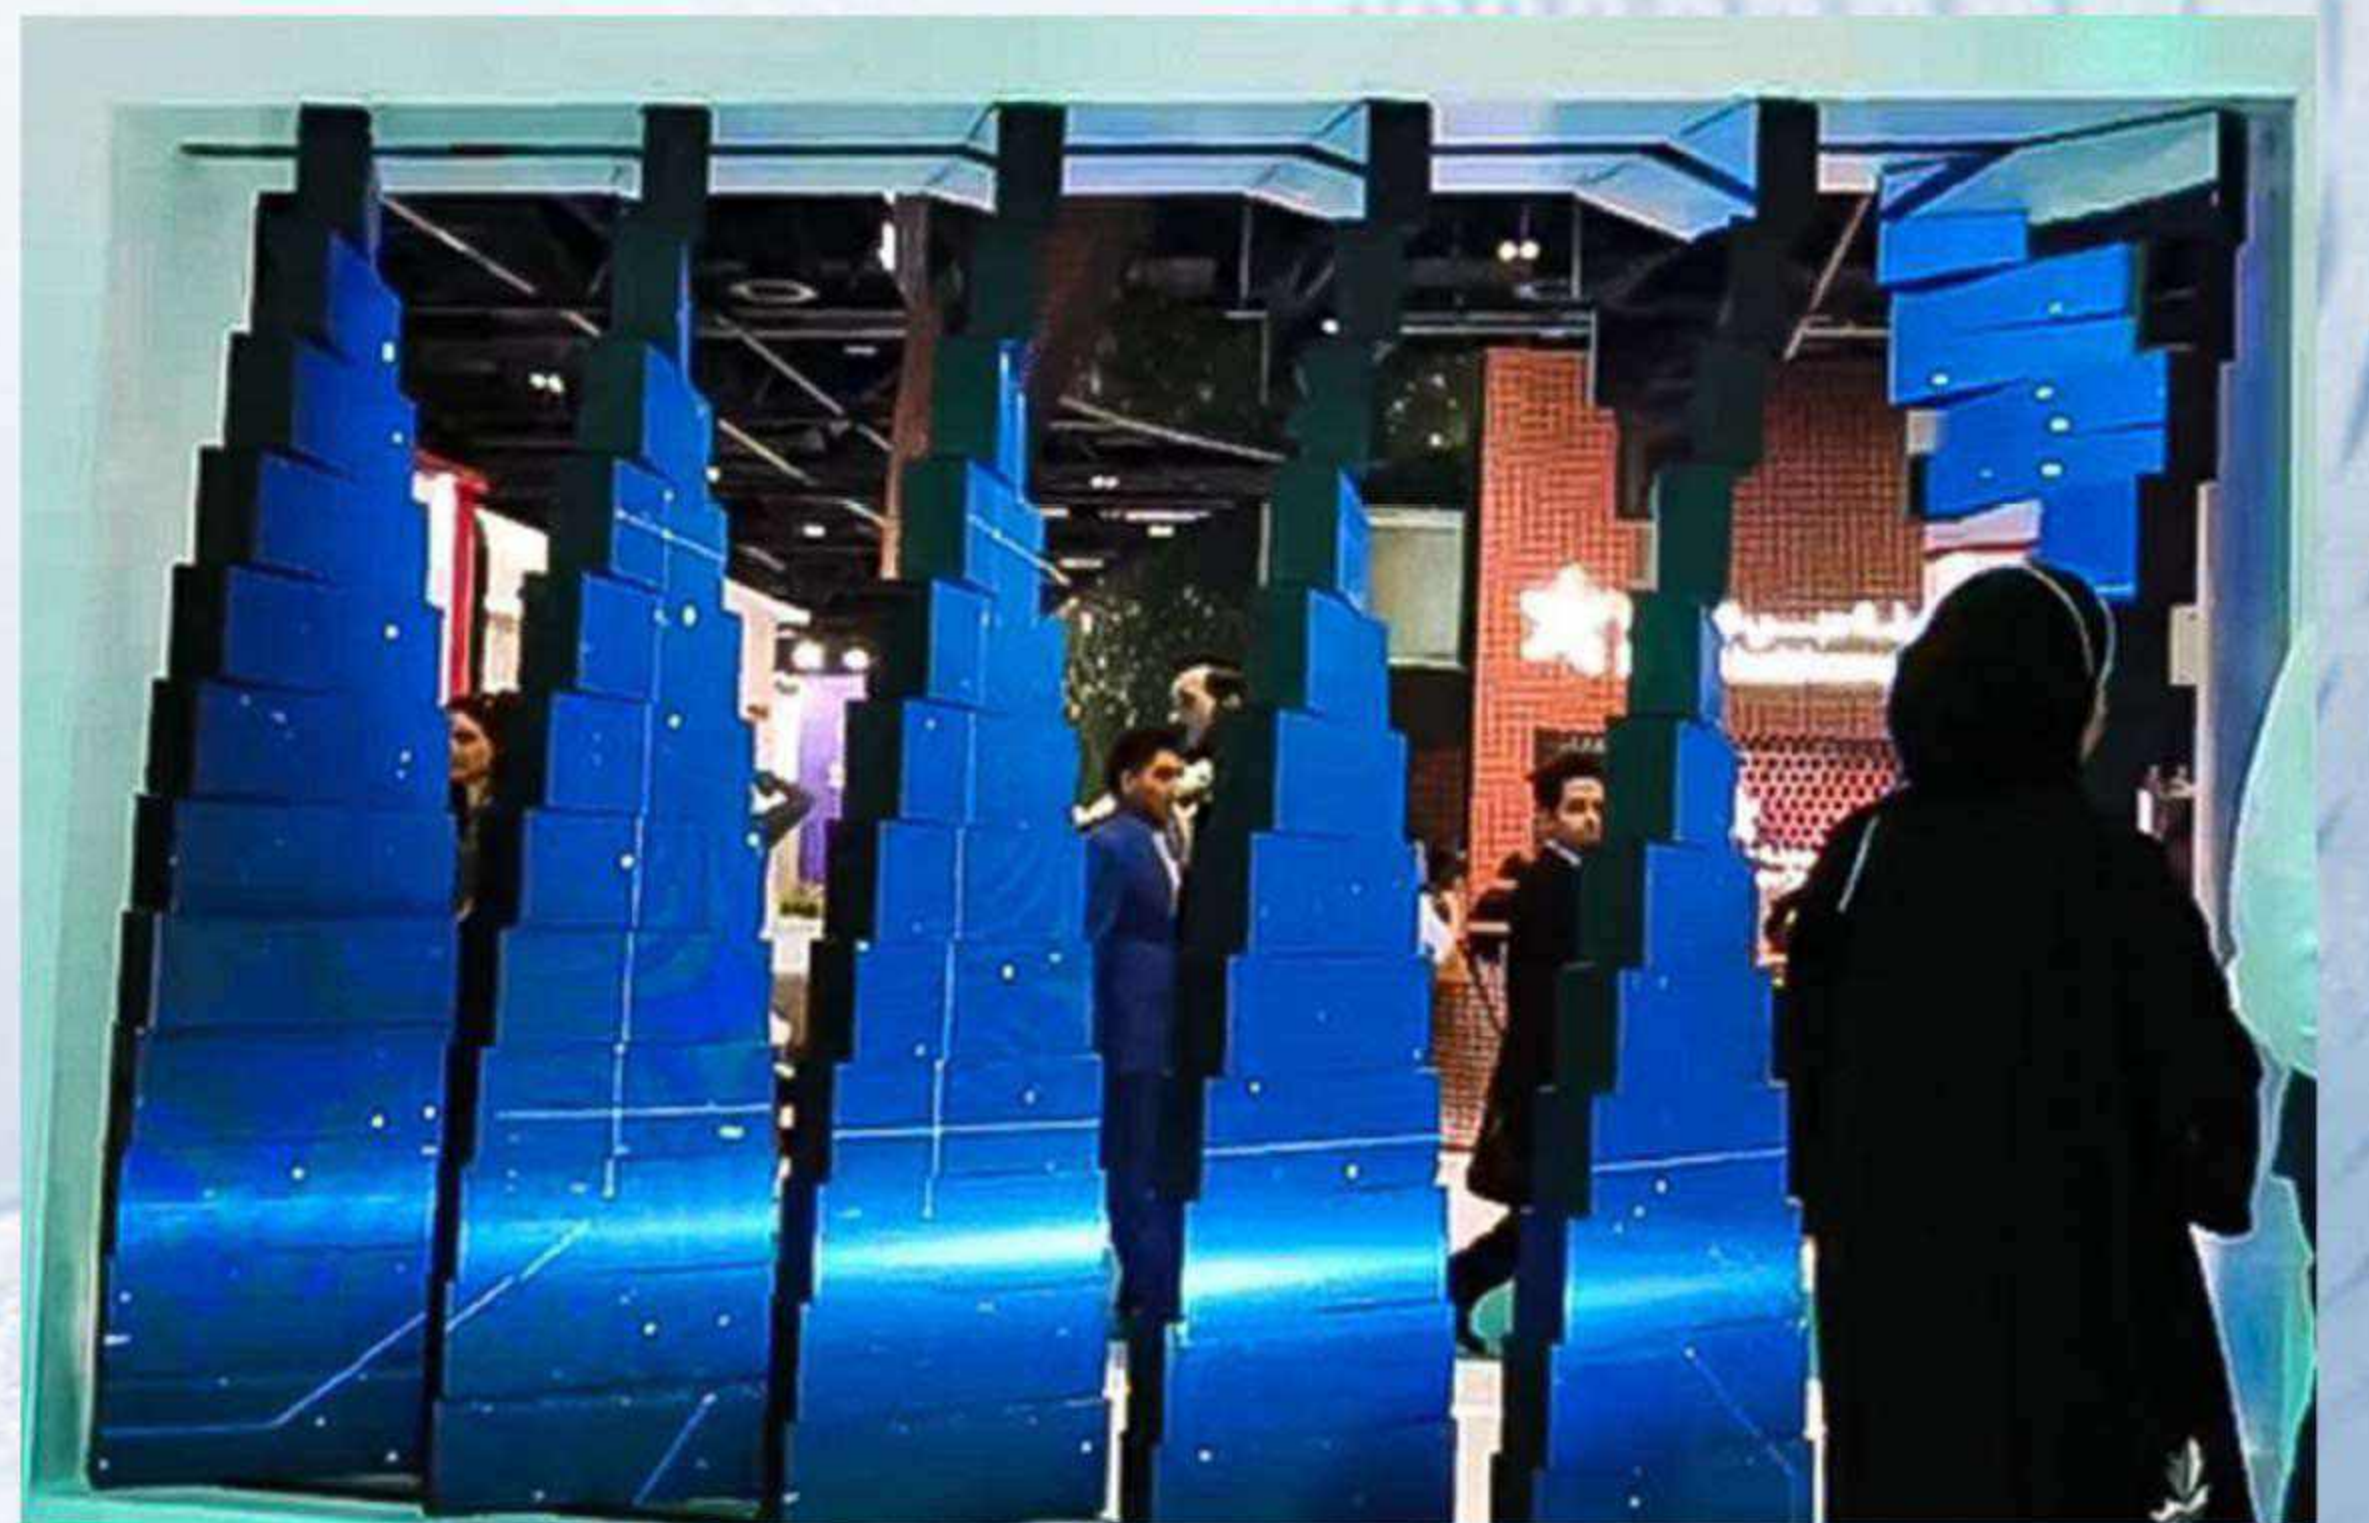

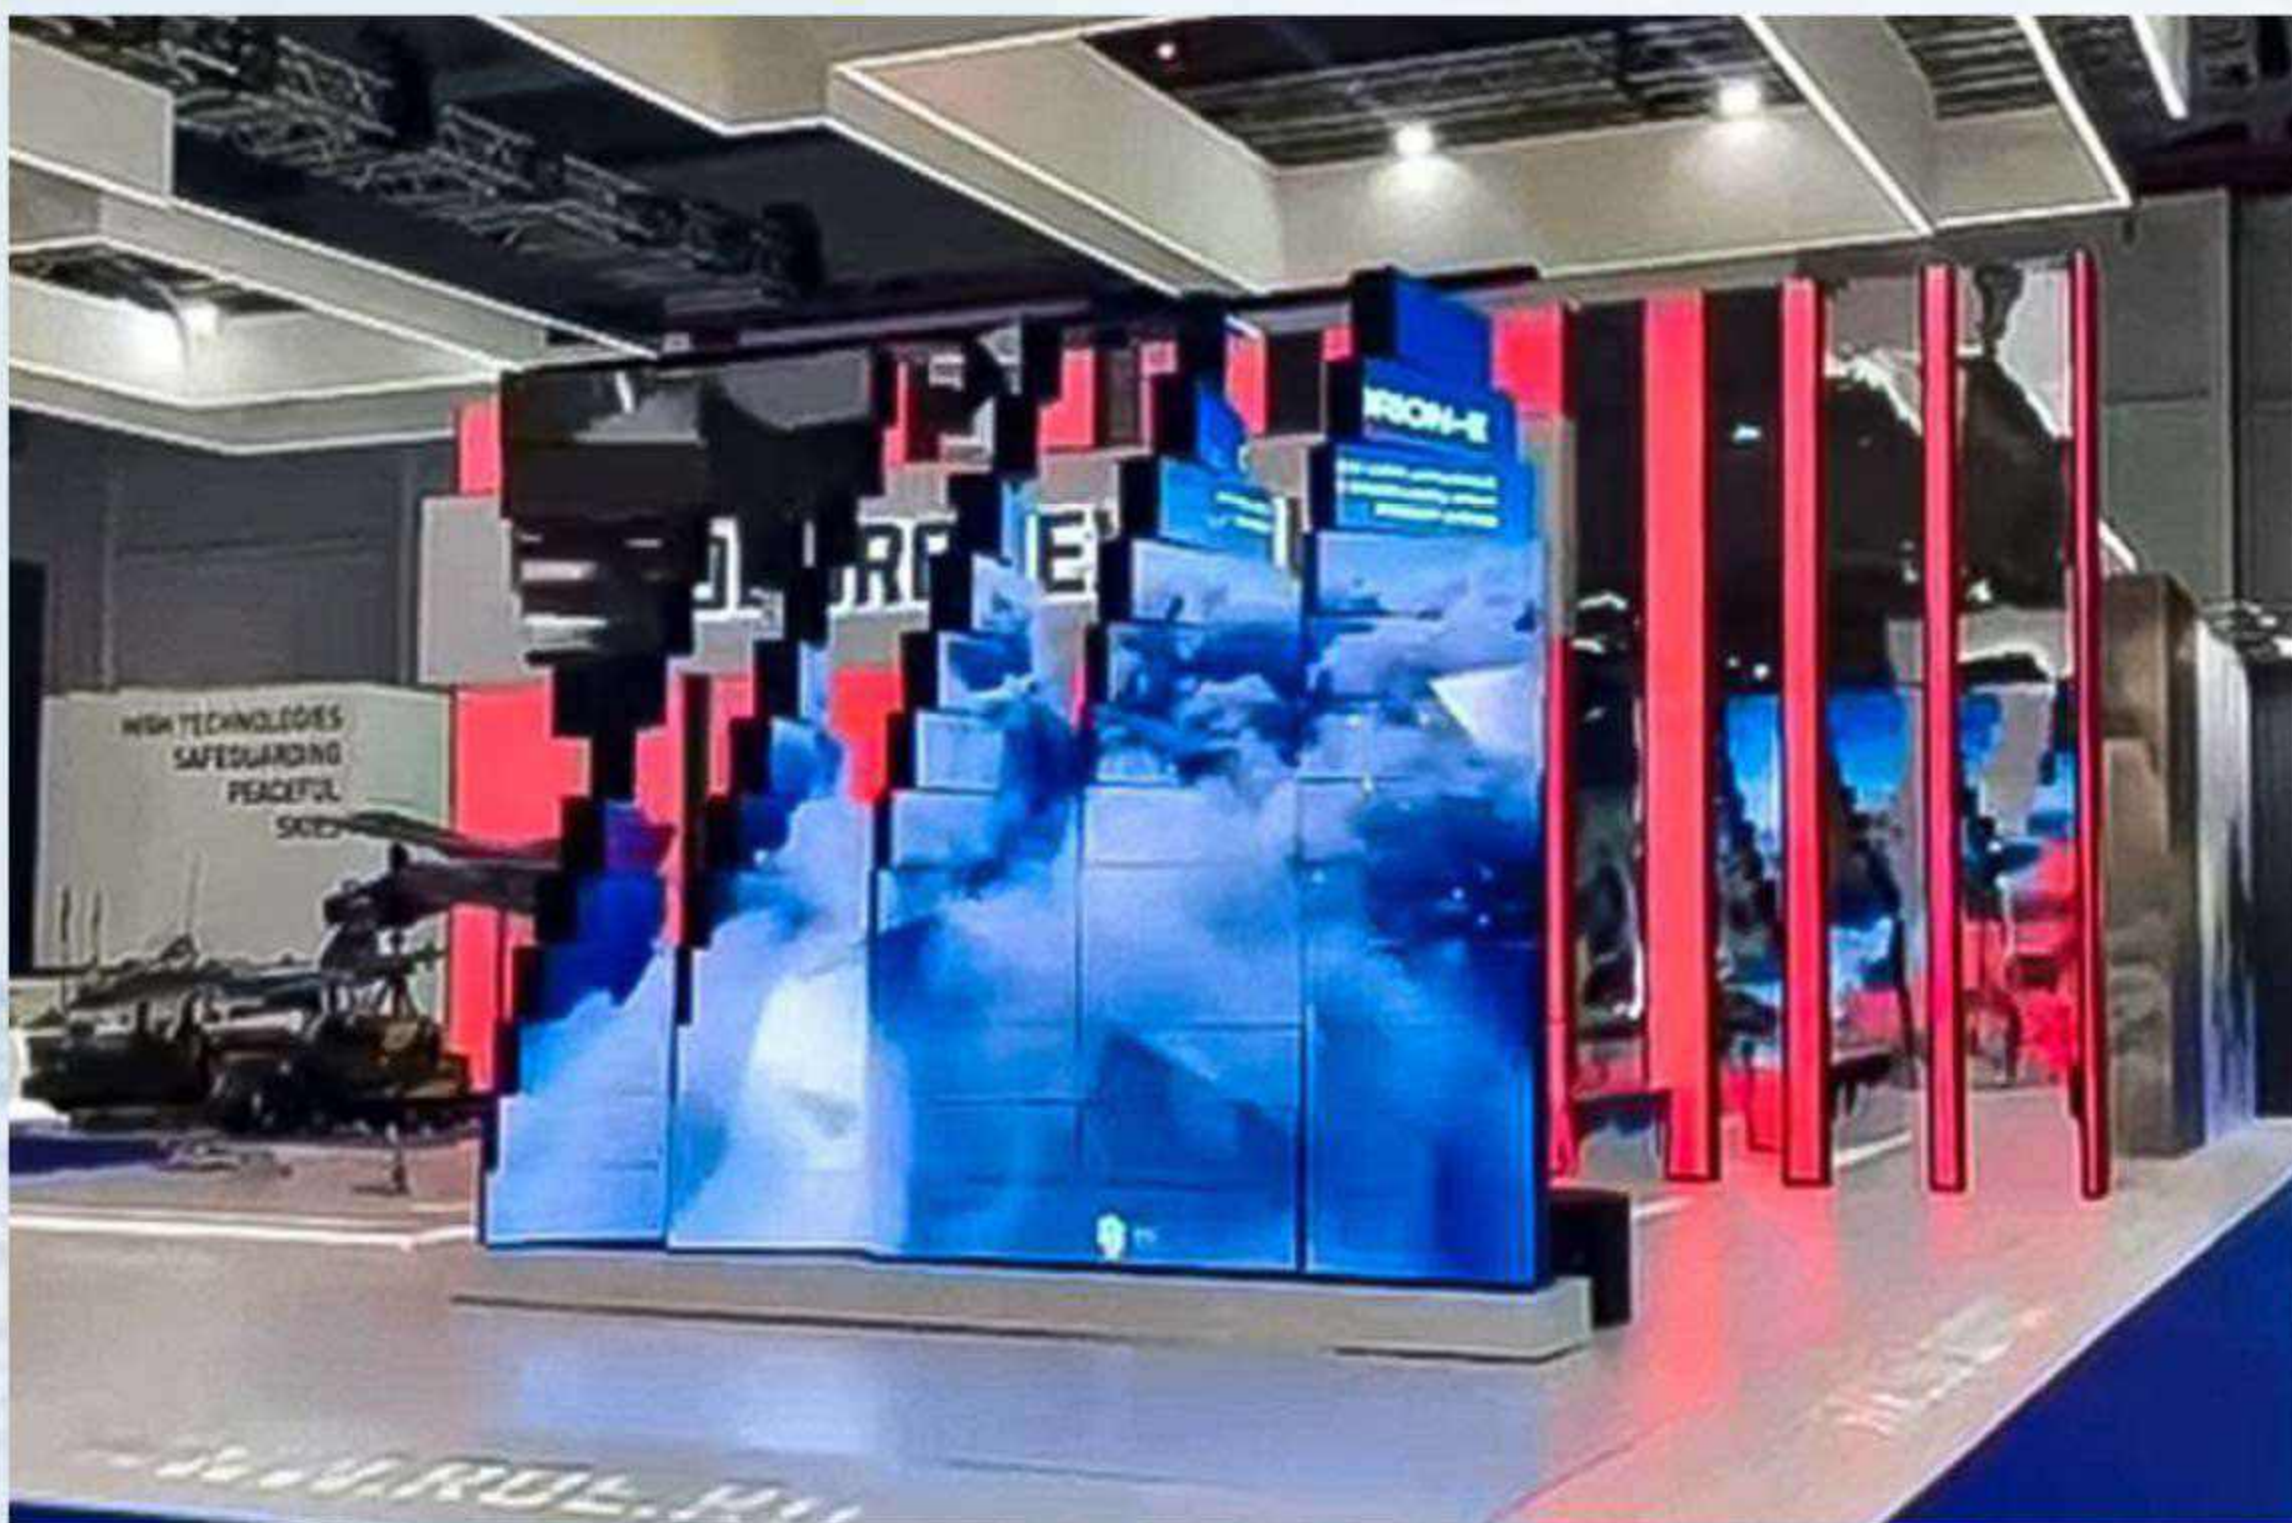

DNA 360 Motion Meets Precision

Designed to Rotate. Engineered to Perform.

One Display. Infinite Perspectives.
